Getting Started in Project Management

Poverty Reduction and Sustainable Development in Rural China

Technologies Related to Participatory Forestry in Tropical and Subtropical Countries

Planning and Management of Participatory Forestry Projects: Project cycle

Building Partnerships for Poverty Reduction

This book outlines the performance and management of mangroves in the changing climatic scenario of the Asia-Pacific region and draws examples and lessons from the national and community-driven mangrove conservation programs of relevant countries including Pakistan, India, Bangladesh, Sri Lanka, Myanmar, Thailand, Cambodia, Indonesia, the Philippines, and Japan as well as the Pacific islands. By highlighting the major drawbacks that hinder effective mangrove conservation, the book contributes towards enhancing climate resilience of communities through proposition of corrective methods and ameliorative approaches of mangrove conservation. Mangroves play an important role in adapting to climate change and provide a plethora of ecosystem services that are fundamental to human survival. Yet these ecosystems are exceptionally prone to extinction due to increased human interventions and changes in environmental boundary conditions. Especially in the Asia-Pacific region, mangroves have dwindled at an exceptional rate over the past three decades. As the threat of climate change hovers over millions of people in this region, particularly those who crowd the low-lying coastal areas, conservation/restoration of mangroves through appropriate policies and practices remain highly imperative. The primary target readers for this book are students and researchers in the fields of conservation and management of mangroves, especially from the developing tropical countries of the Asia-Pacific region. Other target groups comprise policy planners, practitioners, and NGO workers, who will be able to apply the collective knowledge from this work towards proactive mangrove conservation through effective mediation in local communities.
Monitoring and Evaluation of Participatory Forestry Projects

Echinoderms: Munchen

Draws on economic theory, developing country case studies, and lessons learned by OECD nations to examine the relationship between structural adjustment and agricultural research. Structural adjustment programs have been undertaken in many developing countries in an effort to overcome economic instability arising from commodity price shocks, domestic economic mismanagement, and diminishing access to international capital. Such programs take many forms and it is thus difficult to generalize about them, but they have had a profound effect on the economic environment in which agricultural production and consumption occur. This also affects the operation and performance of public sector institutions, including national agricultural research systems. This study examines the complex linkages between structural adjustment and agricultural research. It draws on macroeconomic theory to discuss the relationships between adjustment, policy reform, and institutional change. The report also focuses on country case studies of East Africa, Burkina Faso, Chile, Ghana, Indonesia, Mexico, and Sri Lanka to examine the successes and failures of adjustment programs in relation to agricultural growth rates. The role of the international community, including the World Bank, and experiences of OECD nations in this arena are reviewed.

Anatomy of Participatory Approach in Project Planning and Development

Building a Project Work Breakdown Structure

Delhi is a large city-state with an area of 1483 sq km and a population of 16.7 million where more than two third of its area is urban. Rest of the area is fast urbanizing. For a city like this the planning process is challenging and magnitude of problems is enormous. It should be noted that Municipal Corporation of Delhi initiated projects of preparation of ‘Local Area Plan’ for 36 wards through various planning consultants to address planning issues and problems on identifying the ground realities. Development in Delhi is guided by the Master Plan 2021 and various Zonal Development Plans. The increase in urban population as a whole and increased migration to Delhi has led to a number of planning and development issues as land are a scarce resource in Delhi bounded by other states having their own development controls and guidelines. In order to counter the ill-effects of urban problem diagnosis and rational planning model, the planners and policy makers of Delhi started to engage public in various states of planning and plan implementation in various forms and degrees. The engagement of public in planning has started long back in 1962 when the first Master Plan for Delhi was prepared. Even after 50 years of planning for people the planners and policy makers thought for evolving planning with people approach in planning and this culminated in Delhi in the form of concept of Local Area Plan. In 2005, pilot project for the preparation of Local Area Plan got initiated and got completed and the result was not satisfactory and again in 2010 pilot project for the preparation of Local Area Plan started and by 2012 it got completed. It should be noted that Delhi is one of the Indian city to have a Master Plan for controlling urban growth and development. The need of the people and demand for the development goes hand in hand and this lead to the participation of the public in the plan making process so as to entertain their grievances and make them partner in the development.

Cost-benefit Analysis of the Onchoceriasis Control Program (OCP)

Rural Planning in the Developing World with a Special Focus on Natural Resources

Addresses the issue of international competitiveness from the perspective of developing countries, which must exploit the opportunities offered by international trade and the extraordinarily rapid technological progress of recent years. The book’s central message is that while sound macroeconomic management is crucial for achieving a sustained rise in living standards, it is an economy’s ability to generate and manage technological change that ultimately determines its success in the world market and the pace at which it grows.

Innovation for development

This book addresses the relevance of the case study research methodology for enhancing urban planning research and education in Africa and the global South. It provides an introduction to the case study methodology and features examples of its application to planning research and education on the continent.

Participatory Planning and Project Management in Extension Sciences

Planning and the Case Study Method in Africa

Annotation World Bank Technical Paper No. 282. This volume presents a cost-benefit analysis of the Onchocerciasis (Riverblindness) Control Program (OCP) by examining its costs and the measurable economic benefits gained from the successful control of the disease. Widely recognized as one of the most successful disease control programs in the history of development assistance, the OCP projects the elimination of riverblindness throughout an eleven-country subregion of West Africa within the next eight years. This program, which began in the early 1970s, was the World Bank’s first major venture into the health field. The Bank asked a large donor community of more than 20 governments and international organizations to make a long-term commitment of more than US$500 million to implement the OCP. This paper documents the benefits in economic terms from the large investment and shows that large-scale, well-conceived health interventions are clearly the business of development. The program improves the health and living environment of the rural population and frees previously oncho-ridden tracts of land for settlement and cultivation.
Integrated and Participatory Water Resources Management - Practice

A selection of papers from the proceedings of the Third OIKONET Conference is contained in this book. OIKONET is a European project co-funded by the Education, Audiovisual and Culture Executive Agency (EACEA) with the purpose of studying contemporary housing from a multidisciplinary and global perspective by encompassing the multiple dimensions which condition the forms of dwelling in today’s societies: architectural, urban, environmental, economic, cultural and social. Following on from the first two OIKONET conferences held respectively in Barcelona, Spain in 2014 and Bratislava, Slovakia in 2015, the third conference took place in Manchester, the UK in 2016. Providing a valuable resource for students, lecturers, researchers and others with an interest in housing studies, the papers included in this book cover three themes, namely sustainability of housing environments, innovation in housing design and planning, and participation in housing design and construction.

Participatory Research and Planning in Practice

Attempts to manage natural resources through collaboration rather than competition, by agreements rather than conflict, have become the touchstone for many who see these efforts as the harbinger of global sustainable development. The received wisdom suggests that participatory natural resource management projects work because traditional knowledge of the resources and existing social structures can be utilised to develop more effective strategies for resource use. Participation is a flexible and adaptable concept, which can reflect local circumstances and priorities. The contributors to this volume advise caution as well as optimism for projects conducted in this way. By drawing on the experience of NGOs, national governments and donor sectors as well as academic researchers this volume analyses the theory and practice of participatory natural resource management and demonstrates the value of constructive dialogue between all those involved.

Participation and Partnership in Urban Infrastructure Management

Most people do not truly understand a concept until they can visualize it. This applies to all fields, including Project Management. The best way to effectively manage projects is to help your team visualize the end result as well as the steps needed to achieve that result. Help Your Team Visualize the Right Path to Success Building a Project Work Breakdown Structure: Visualizing Objectives, Deliverables, Activities, and Schedules employs a diagram approach to project planning and scheduling. This useful tool empowers business professionals to take control of and successfully communicate their projects, ensuring they are completed on time with their targeted impact. Industry professional Dennis P. Miller, a consultant to leading Fortune 500 companies, thoroughly explains the keys to an effective Work Breakdown Structure (WBS) through an Eight Step Process. He has refined this process over a period of twenty years, applying it to over 100 projects ranging from software development to social events. The Eight Step Process starts with a concentrated effort to define the project through its deliverables. The middle steps walk the project team through a process of activity definition and sequencing and resource assignment. Finally, the last steps involve estimating the duration and verifying the project timeline. Not Just What to Do, But How to Do It! This is a hands-on volume that includes a practice section for each of the eight steps, providing readers with real examples of how the author has successfully applied this process. The result of its application is a visualization of the project’s objectives, deliverables, activities, and schedules. Over 130 illustrations enrich the instructions. Project managers are assured of success by following the simple tools in this unique and comprehensive volume.

World Bank Lending for Small Enterprises, 1989-1993

Analytical Issues in Participatory Natural Resources

Whether working on an international project for a Fortune 500 company or organizing a family reunion, you need effective project management to ensure timely and efficient completion of projects. This helpful guide offers explanations of everything needed to get started in project management including: how to initiate a project and lead the project team, how to structure the project and plan for resources, how to monitor and track the plan, and how to close out the project. Packed with practical advice, this book includes tips to increase success, reveals common pitfalls to avoid, and presents case studies to show and why project management actually works. Paula Martin (Torrington, CT) is the CEO of Martin Tate, a management consulting and training company. She works with project teams to help them improve performance and has been a consultant on issues related to improving organization performance for over ten years. Karen Tate (Cincinnati, OH) is the President of Martin Tate and is a Project Management Professional. She has over twenty years of project management experience and teaches project management to teams in organizations around the world.

CIRDAP Report

Project Planning and Management: An Aspect of Development

This open access book provides in-depth insights into participatory research and planning by presenting practical examples of its use. In particular, it describes theoretical and methodological aspects of participatory research and planning, as well as the implementation of participatory processes in fields such as transport planning, cultural heritage management, environmental planning and post-earthquake recovery. Further, it compares participatory planning experiences from different territorial levels - from the macro-regional, e.g. Southeastern Europe, Mediterranean or European metropolitan regions, to national, regional and local levels. The book will help researchers, planners, public administration officials, decision-makers and the general public to understand the advantages, disadvantages and constraints of participatory planning and research. Using various examples, it will guide readers through the theory of participatory planning and research, its methods, and different perspectives on how to use it in practice. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.
Engendered Orange-Fleshed Sweetpotato Project Planning, Implementation, Monitoring and Evaluation: A Learning Kit

This important volume provides a source of information on the key issues, including constraints and capacity building, necessary to implement participatory approaches in China today. A wealth of case studies are provided by principal Chinese academics and practitioners in forestry, natural resource management, rural development, irrigation and poverty alleviation. At the core, the book is about strengthening local government as a key player in the development of participatory initiatives. It is an invaluable text for development practitioners, donors, researchers and students seeking to understand the opportunities and constraints for participation in China, and for those working to institutionalize participatory processes in a complex rural context.

The Transform Directory

Refugees, Environment and Development is concerned with the complex interrelationships between forced migration, natural resource management and ‘sustainable development’. The book challenges the growing rhetoric that refugees ‘cause’ environmental degradation, and that environmental decline is promoting a new wave of ‘environmental refugees’. Drawing on examples from Africa, Asia and Latin America, as well as detailed case studies of the Rwandan emergency of 1994-96, and lesser known refugee movements to Guinea and Senegal in West Africa, the book argues against a neo-Malthusian view of the relationship between population, environment and migration. The author explores alternative approaches to the dynamic processes of social and environmental change in refugee situations. This is an ideal text for undergraduate and postgraduate students concerned with environment, development and migration studies, as well as policy-makers and practitioners in the field.

Participatory Planning And Project Management of Extension Sciences

This comprehensive directory will provide managers with up-to-date information on thousands of courses in 15 countries in East and Southern Africa, and gives practical advice on how to manage training and consultancy. The directory is divided into country sections, with a full index of course subjects at the back of the directory for ease of reference. Each entry contains a list of course available, course content, costs, who the course is designed for and full contact details of the organization. Transform is a network of African Training Organizations and a UK Transform Unit. The directory builds on their practical experiences over the last five years.

Co-Engineering and Participatory Water Management

Mapa - a Practical Guide to Integrated Project Planning and Evaluation

A project comprises a series of activities (investments) that aim to solve problems within a given time frame with a clear set of objectives for man’s benefits. It is an undertaking that involves the commitment of scarce resources in the expectation of future benefits. Before achieving the objectives, a project goes through several stages of a project cycle. In this study, the author discusses and analyses concepts of project planning and management. On the one hand, he refers to the project in general, and on the other hand, he represents the different stages of project planning and project management.

Community Participation in China

A trans-disciplinary book offering evaluation-based approaches for effective participatory interventions, for academic researchers, practitioners and policy-makers working in water management.

Japan’s Experiences in Public Health and Medical Systems

Since 1972, scientists from all over the world working on fundamental questions of echinoderm biology and palaeontology have conferred every three years to exchange current views and results. The 11th International Echinoderm Conference held at the University of Munich, Germany, from 6-10 October 2003 continued this tradition. This volume comprises 95 submitted papers and 96 abstracts covering a wide spectrum from innovative student contributions to the lessons learnt from experienced specialists. The content of the contributions ranges from original research results to the latest synopses concerning a variety of topics, including visual sensing, larval cloning, mutable collagenous tissues, sea urchin aqua-culture, deuterostome phylogeny, palaeobiology and taphonomy.

PLA Notes 41: General Issue

Managing Community-based Development

The Financing of Pension Systems in Central and Eastern Europe

Regional Development Dialogue

Refugees, Environment and Development
This edition analyses how trade can contribute to economic diversification and empowerment, with a focus on eliminating extreme poverty, particularly through the effective participation of women and youth. It shows how aid for trade can contribute to that objective by addressing supply-side capacity and trade-related infrastructure constraints, including for micro-, small- and medium-sized enterprises notably in rural areas.

**Participatory Mangrove Management in a Changing Climate**

Environmentally Sustainable Development Agricultural Research and Extension Series. Banana Improvement Project Report No. 1. Presents an overview of current and planned activities in institutions working on the Banana Improvement Project, co-sponsored by the Common Fund for Commodities, the FAO Intergovernmental Group on Bananas, and the World Bank. The project has two important objectives: to develop improved banana varieties suitable for the international market and to improve pest and disease control practices with the object of reducing pesticide use and its harmful environmental impact.

**Participatory Project Management**

Nothing provided

**Participatory Planning in Plan Preparation**

**Global Dwelling**

This paper describes and illustrates a range of participatory strategies to assist urban managers in expanding the role and effectiveness of user participation in the provision and operation and maintenance of infrastructure. To demonstrate how participation has been effectively employed in various circumstances, numerous case studies are cited. Finally, measures and steps are outlined that could be instrumental in realizing participatory strategies. (Adapté du résumé de l'auteur).

**Organisations and Their Approaches in Community Based Natural Resources Management in Botswana, Namibia, Zambia and Zimbabwe**

ANATOMY OF PARTICIPATORY APPROACH IN PROJECT PLANNING AND DEVELOPMENT: AN AGRO-ECOLOGY PERSPECTIVE This book is focused on Participatory Approaches to Agro-ecology in Practice. The book is composed of five chapters. Chapter 1 deals with the general introduction and definition of terminologies. Chapter 2 considers Participatory Approaches and Practices in Agro-Ecology: the Kolb's Cycle. The 3rd chapter deals with the Concept of Community Development. This is followed by Participatory Agro-Ecology Project Planning and Management in chapter 4. Chapter 5 develops and gives a critical look at the concept of Management Ethics focusing on the Project life.

**Aid for Trade at a Glance 2019 Economic Diversification and Empowerment**

An international journal focusing on third world development problems.

**Participatory Community Work**

In Indian context.
